IFT 301 – Web Programming for Human Computer Interaction

Web Design Project – Project Update 2

Name: Brandon Trinkle
ASU ID: 1217455031
Date: 4/20/2024

Instructions: You should have at least **six pages of your site and one CSS file completed** by the time you submit this assignment. Use the questions below to have a written discussion about the current progress of your web design project. After you answer the questions below, insert a screenshot of the pages you have completed so far as viewed in the browser. **Do NOT screenshot the HTML code.**

1. How do you feel your web design project is coming along?

I feel great about my webpage. I have completed it and uploaded it to the hosting website!

2. Since your last update, what issues have you encountered? Have you already resolved them? How? If not, how do you plan to resolve them?

All issues have been resolved. I did not like the color scheme I picked out, so I completely revamped the website colors.

3. Describe where you would like to use JavaScript on your website. Do you have any questions about using JavaScript?

I used JavaScript on three different pages. I have two slideshows and a form authentication script.

4. Your web design project is almost done. Outline what you have left and how you plan on completing it.

I have tested everything on the ASU hosting website, I do not plan to complete any more actions.

5. With your site almost done, has your sitemap changed? If so, revise your previous sitemap and insert it below.

I haven't changed the site map, I just changed the color scheme. Admittedly I am not the best designer, I don't have a creative mind. However, I am happy with the way it looks.
